Earth 911 Green Holiday Tips

GIFT GIVING

- Choose or make gifts that are practical and consist of environmentally friendly materials.
- Instead of exchanging unwanted items with coworkers or extended family, suggest donating to a charity as a group.

WRAPPING

- Use recycled or recyclable materials for packaging gifts; reuse a nice tin, box, or gift bag.
- Select uncoated giftwrap that can be recycled and/or burned safely.
- Make gift tags from small pieces of the existing wrap or from old holiday cards.

CARDS

- Consider cutting back your list. Choose cards made of recycled materials, or even buy them from a charity that benefits the environment.
- If your friends are web-savvy, skip the post office altogether and send cards via e-mail.

TREES

- Consider a synthetic tree or wreath that can be used year after year.
- Buy a potted tree with roots that can be planted after the holidays.
- Decorate with recyclable, compostable, or bird-friendly materials.
- Recycle unadorned cut trees.

LIGHTS

- Trade in your energy guzzling lights for newer, energy saving lights.
- Use fewer lights.
